OBJECTIVE

Seeking a full-stack engineer position.

SUMMARY

Full-stack software engineer experienced in building production-grade web applications using the MERN stack, Node.js/Express, and cloud-native infrastructure. Skilled in integrating enterprise systems through SDKs and REST APIs, including developing custom chatbot applications using the Genesys Cloud SDK. Strong background in NLU engineering, multi-market deployments, and regulated content workflows across global chatbots and voicebots. Adept at troubleshooting backend infrastructure (Kubernetes, OpenShift, ArgoCD, Cloudflare/WAF) and collaborating with cross-functional teams to deliver scalable, user-centric digital experiences.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript • Node.js/Express.js • React.js • MERN stack • Python • Java • C++

Web & Application Development: RESTful APIs • JSON • CSS • Bootstrap • Git/GitHub • Figma

Cloud & Infrastructure: Azure • Kubernetes • OpenShift • ArgoCD • Cloudflare/WAF

Conversational AI: Genesys Cloud • Genesys SDK • Microsoft Bot Framework • NLU configuration • Salesforce (Genesys integrations)

Databases: PostgreSQL/MySQL • MongoDB

WORK EXPERIENCE

Associate – Business Analysis

Eli Lilly, Indianapolis, IN • 2024 – Present

- Built MERN-based chatbot applications integrated with the Genesys Cloud SDK; designed front-end components, backend services, and API orchestration.
- Led Live Chat deployments across Spain, Ireland, UK, and Italy; supported US Live Chat; provided architectural patterns adopted by the Netherlands, Belgium, France, and Australia.
- Developed and tuned NLU models for IVR systems across 8+ countries and the US; created intents/entities and refined utterances, keywords, and entity mappings.
- Performed localization and cross-language NLU tuning using translation workflows and linguistic QA tools.
- Built structured conversational modules for medical chatbots; executed MLR/CHG workflows and Xray QA test suites.
- Troubleshooted backend infrastructure across Kubernetes, OpenShift, ArgoCD, Cloudflare/WAF; updated ConfigMaps/secrets and redeployed services.
- Authored technical documentation and collaborated with platform engineers, PMs, and global affiliates.
- Scale of Work: 74+ medical chatbot tickets • 189+ NLU tickets • 10+ UX tickets • SME for 4 markets

Software Engineer Intern

Eli Lilly, Indianapolis, IN • Summer 2023

- Developed internal web applications using ReactJS, React Flow, CSS3, and GitHub.
- Built a reusable no-code web app enabling business teams to design chatbot conversations.
- Presented POC deliverables to executives; projected a 50% reduction in development time and cost.

Software Developer Intern

Comcast Corporation, Philadelphia, PA • Summer 2022

- Rebuilt the Merlin Component UI using NodeJS, ReactJS, and Bootstrap.
- Engineered UI components to visualize complex customer data relationships.
- Contributed to a capstone project analyzing customer satisfaction using Jira, Medallia, and NPS data.

EDUCATION & PROFESSIONAL DEVELOPMENT

Cheyney University of Pennsylvania — Cheyney, PA B.S. Computer Science, GPA 3.61; B.A. Liberal Studies (Business Analytics), GPA 3.61

Codecademy — Professional Certification in Full-Stack Engineering, October 2026

ACTIVITIES & LEADERSHIP

BDPA Lilly Delegation (Co-Lead) • STEM Club (President & Co-Founder) • HBCU Battle of the Brains (Finalist) • IEEE Computer Society • NSBE
