• Git • GitHub • Microsoft Office • Salesforce • Jira • Medallia • SAFe • Figma • Frontend

WORK EXPERIENCE

2024 - Current **Eli Lilly** Indianapolis, IN

Associate – Business Analysis

- Develop voicebots and live chat transition flows for Global Lilly affiliates within Genesys Cloud, owning end-to-end design and build across routing, interaction flows, and NLU configuration.
- Build product-site chatbots using JSON, Azure services, and the Microsoft Bot Framework, enabling patients and HCPs to access timely information and support.
- Coordinate the CTI intern program, organizing events, aligning with supervisors and mentors, and providing day-to-day guidance to interns.

Summer 2023 **Eli Lilly** Indianapolis, IN

Software Engineer Intern

- Partnered with Lilly business-facing IT groups to develop new business applications based on ReactJS, React Flow, CSS3, and GitHub for source control.
- Developed a reusable web app that enables business teams to create chatbot conversations using no-code.
- Presented Proof-Of-Concept (POC) activities associated with the web app project to business executives.
- Projected to save business users and developers 50% in time and cost.

Summer 2022 **Comcast Corporation** Philadelphia, PA

Software Developer Intern

- Rebuilt Merlin Component User Interface (UI), a proprietary backend database query tool that enables employees to mine customer data that supports product development.
- Built state-of-the-art UI to visualize complex data relationships using NodeJS, ReactJS, and Bootstrap.
- Contributed to a capstone project analyzing customer satisfaction using Jira, Medallia, and NPS data to recommend improvements to product experience.
